

Animal Science Minor

(19 hours)

A minor in Animal Science is ideal for a student with a personal or career interest in animal production, health, or research. The selection of advanced electives allows students to focus on their area of interest. This minor in combination with another major expands the career opportunities for graduates giving them basic exposure to the animal science industry.

Required Courses (10 hours):

- _____AG1445- Animal Husbandry
- _____AG3325- Animal Nutrition
- _____AG3331- Reproduction in Farm Animals

Choose 9 hours from the following advanced agriculture courses:

- _____AG3301- Genetics of Livestock and Plant Improvement
- _____AG3314- Animal Health and Disease Control
- _____AG3321- Range Management
- _____AG4326- Advanced Animal Husbandry-Ruminants
- _____AG4330- Food Technology: Processing Meats

Declaring Your Minor:

To declare your minor, you need to complete an application for change of major/minor code with the department of your major. For the animal science minor, indicate code 114.00. Questions about this minor can be directed to the Department of Agriculture at (512) 245-2130 or email ag@txstate.edu.¹
